Note: *Hibbertia porcata* status is taken from RBG online Census rather than DELWP Advisory List due to recent taxonomic revision.

The definitions for the fields are listed below;

**Origin:** Taxa are indigenous to the Bend of Islands unless noted as follows: -

\*: Naturalised exotic (introduced) taxa

#: Taxa treated as alien within the Bend of Islands (a Victorian native that has extended its geographical range of distribution beyond its known or suspected original distribution)

**Scientific Name:** Scientific or botanical name

**Common Name:** Common, English or vernacular name (as per the Victorian Biodiversity Atlas (DEPI, 2014).

**Life form:** Growth habit (as per the Victorian Biodiversity Atlas (DEPI, 2014).

**STATUS:** Nominated on the DELWP Advisory List (previously known as Victorian Rare or Threatened Taxa (VROT)).

Although there are no direct legal requirements that flow from inclusion of a species in the advisory list, taxa assessed as rare, threatened or endangered are considered through the native vegetation planning permit.

**e:** Endangered in Victoria: at risk of disappearing from the wild state if present land use and other casual factors continue to operate

**v:** Vulnerable in Victoria: not presently endangered but likely to become so soon due to continued depletion; occurring mainly on sites likely to experience changes in land-use which would threaten the survival of the plant in the wild; or. Taxa whose total population is so small that the likelihood of recovery from disturbance, including localised natural events such as drought, fire or landslip, is doubtful

**r:** Rare in Victoria: rare but not considered otherwise threatened - there are relatively few known populations or the taxon is restricted to a relatively small area.

**k:** poorly known in Victoria: poorly known or suspected, but not definitely known, to belong to one of the above categories (e, v or r) within Victoria. At present, accurate distribution information is inadequate.

**NOTE: this list is based on the Co-op Sector of the BICA FLORA LIST 1-2015**
